Tables

2.1 Average effect for each of the major contributors to learning	18
4.1 Summary information from the meta-analyses on the contributions from the student	39
5.1 Summary information from the meta-analyses on the contributions from the home	61
6.1 Summary information from the meta-analyses on the contributions from the school	74
6.2 Synthesis of meta-analyses and major studies reducing class size from 25 to 15	87
7.1 Summary information from the meta-analyses on the contributions from the teacher	109
8.1 Summary information from the meta-analyses on the contributions from the curricula	130
9.1 Summary information from the meta-analyses on the contributions from teaching approaches	162
9.2 Relation between goal difficulty and performance	165
9.3 Difficult compared to "do your best" goals	165
9.4 Relation of self-efficacy to goal attainment	166
9.5 Various metacognitive strategies and the effect sizes (Lavery, 2008)	190
10.1 Summary information from the meta-analyses on the contributions from teaching approaches	201
10.2 Effect sizes for various teaching strategies (from Seidel & Shavelson, 2007)	202
10.3 Effect sizes for various teaching strategies (from Marzano 1998)	203
10.4 Summary of effects from comprehensive teaching reforms (Borman <i>et al.</i> , 2003)	216
10.5 Summary of effects from computer-based instruction	222
10.6 Summary of effects from computers as substitute and as supplement to the teacher	223
10.7 Summary of effects from using computers with the same or a different teacher	223
10.8 Summary of major uses of computers in classrooms	224
11.1 Effect sizes for teacher as activator and teacher as facilitator	243
11.2 Effect sizes from teaching or working conditions	244

Figures

1.1 Percentage of responses as to the claimed influences on student learning by students, parents, principals, and teachers	5
2.1 An achievement continuum	7
2.2 Distribution of effect sizes across all meta-analyses	16
2.3 Number of meta-analyses above and below the h-point	19
2.4 A typical barometer of influence	19
2.5 Funnel plot of the effect size and sample size from each meta-analysis	21
7.6 Effect sizes for nine teacher-student relationship variables	119
8.10 The percentage of students performing below, at, and above expectation in each year level	141
8.24 Higgins <i>et al.</i> four-part thinking model	156
9.9 A model of feedback	176
10.18 The number of computer-based meta-analyses and their overall effect size	220
10.19 Relation between effect sizes for computer-based instruction and year of publication	221
11.1 A model of Visible teaching - Visible learning	238
11.2 The means for the National Board certified teachers (NBCTs) and non-National Board certified teachers (non-NBCTs), and the effect size of the difference between these two groups	260
11.3 Percentage of student work from NBCTs and non-NBCTs classified as surface or deep learning	260

"Visible Learning is the definitive book on sorting out the
of teaching strategies - a must read for those who want to improve
teaching and learning."

- Michael Fullan

This unique and ground-breaking book is the result of 15 years' research and synthesises over 800 meta-analyses relating to the influences on achievement in school-aged students. It builds a story about the power of teachers and of feedback, and constructs a model of learning and understanding.

Visible Learning presents research involving many millions of students and represents the largest ever collection of evidence-based research into what actually works in schools to improve learning. Areas covered include the influences of the student, home, school, curricula, teacher, and teaching strategies. A model of teaching and learning is developed based on the notion of visible teaching and visible learning.

A major message within the book is that what works best for students is similar to what works best for teachers. This includes an attention to setting challenging learning intentions, being clear about what success means, and an attention to learning strategies for developing conceptual understanding about what teachers and students know and understand.

Although the current evidence-based fad has turned into a debate about test scores, this book is about using evidence to build and defend a model of teaching and learning. A major contribution to the field, it is a fascinating benchmark for comparing many innovations in teaching and schools.

John Hattie is Professor of Education and Director of the Visible Learning Labs, University of Auckland, New Zealand.
