8 From the past to the here and now: documents and documentary research	94
9 Making sense of data: analysing numbers and words	102
10 Writing up	118
Index	133

STUDY SKILLS IN
EDUCATION

Success with your Education Research Project

j-40209

This series addresses key study skills in the context of education courses, helping students identify their weaknesses, increase their confidence and realise their academic potential. The series tackles information skills, research methods, critical thinking and assignment writing and the books are suitable for students on:

- any course of Initial Teacher Training leading to the award of QTS (primary or secondary);
- a degree in Education or Education Studies with or without QTS;
- a degree in Early Years or Early Childhood Education;
- a foundation degree in education or any education-related subject discipline.

Success with your Education Research Project is a practical, user-friendly text on research methods aimed specifically at undergraduate students on education courses. Research projects are carried out in schools and non-school settings by virtually all undergraduates in the areas of teacher training, Education Studies and other educational disciplines, and this book makes clear references to these courses and contexts throughout. All chapters include learning outcomes, worked examples, practical and reflective tasks and summaries of key points. Topics such as using the net and plagiarism are covered with up to date information, while key content on literature searches, critical thinking and the development of argument provides clear guidance and ensures deeper understanding.

The Author

Professor John Sharp is Head of the Department of Education Studies at Bishop Grosseteste University College Lincoln.
